**POWER FAILURE**
The Center's emergency generator is designed to promptly restore power to key areas such as exits, public concourses and service halls after a power failure.

It is normally not advisable to evacuate the building in a power failure, especially during darkness or severe weather. Please, remain at your current location and await instructions from Center Public Safety or Emergency Response Teams.

**LOST & FOUND**
If you have misplaced a personal item during an event, please check first with your Registration Desk or Show Office, and then with Center Public Safety (912-447-4077). After an event, items are logged into the Public Safety Office Lost & Found and maintained for a period of 30 days. Items not claimed within 30 days of loss may be disposed of at Center's discretion.

**PERSONAL SAFETY & SECURITY**
The Center is a public facility. While we strive to ensure public safety, proactive steps to ensure your own personal safety & security are by far the most effective:

+ Always keep your personal belongings, such as purses, cameras, etc. with you.
+ Never leave personal belongings in the open—not under a table or in a dark corner—with them or you.
+ Always be aware of your surroundings.
+ Always lock your vehicle, and put valuables in the trunk or completely out of view.
+ Please, report any incident to your Event Manager or Public Safety, 912-447-4077.

**WEATHER-RELATED EMERGENCIES**
In case of a *Severe Weather Warning* for our area, it may be necessary to relocate to areas of the building designed to withstand these conditions. Center staff will direct you to appropriate interior areas—like restrooms, stairwells and other spaces that don't contain glass—and away from an exterior wall. Remember:

*Move away from areas with glass walls or skylights!*

**EMERGENCY EVACUATION**
If an evacuation is necessary, Center staff and public address announcements will assist you in moving quickly from building to designated Assembly Area.

**FIRE EMERGENCY**
*In case of fire,* Center's alarm system will activate sirens, flashing "strobe" alarms, and PA announcements to leave the building promptly by the nearest exit. Look around: how will you leave the area quickly if you need to? Remember:

--there are always two or more exits from any Center public or function space; and
--the way you came in may not be the best, or closest, way out.

**Questions? Suggestions?**
To General Manager, Savannah International Trade & Convention Center, (912) 447-4000, (888) 644-6822, Fax: (912) 447-4722

*Revised: March 2019*
Welcome to Savannah!

We’re pleased to be your hosts, and ready to help make your visit safe and enjoyable. In the unlikely event of an emergency, Center staff are trained to respond quickly and effectively. It’s also important to be aware of some basic actions in an emergency situation. Please, take a moment to familiarize yourself with these

EMERGENCY RESPONSE PROCEDURES

MEDICAL & OTHER EMERGENCIES

Emergency Medical Technicians are on site for many larger events. Center Teams are also trained on First Responder duties, including CPR and Automatic Emergency Defibrillator (AED) procedures.

If you encounter a medical or other emergency 'on campus', please:

--Alert any Center staff in the area;
--tap the EMERGENCY button on any Courtesy Phone (near public restrooms).
--Or dial 912-447-4077 or 912-313-6948 from any phone.
--briefly describe the emergency, then stand by to guide responding Center personnel.

--Please, do not contact 911 (Police, Fire-Rescue etc.) directly unless it’s clearly necessary. It may delay emergency response to the site.

Upper (Mezzanine) Level: Where am I? How do I get out?
